

FLORA OF BRAZIL

Federal District

No. R. 6479

Cardiopetalum calophyllum Schlecht.

Parque Nacional de Brasília (HQ Buildings
15°44'S 47°55'W), Córrego de Rego.

In cerradao on the margin of gallery
forest.

Tree 7m tall, 8cm dbh. Bark with small,
narrow, vertical fissures, rather like
those of *Calophyllum brasiliense* but much
smaller. Growth form of typical
Annonaceous 'Pindaíba type' (ie ±
spruce-like). Very floriferous. Sepals
and petals yellow-cream.

Date: 4.10.1990

Coll.: J.A. Ratter & Paulo Cesar Mendes
Ramos.
