

FLORA OF BRAZIL
State of Maranhão

No. R7791

Cenostigma angustifolium Tul.

125km from Floriano on the road to Balsas (BR 230)
(approx. 6°35'S 44°05'W).

In roadside cerradão.

Tree, 11m tall, 40cm dbh with 'lattice' trunk (like fig, *Aspidosperma nitidum* ('Carapanaúba'), or *Miconia guianensis* ('Acaricoara')). Bark brown. Abundant along roadside and seems to be a colonizing species.

2 viii 1997

Coll. J.A. Ratter, S. Bridgewater & J. Fonsêca Filho.
