

FLORA OF BRAZIL
State of Tocantins

No. R7879

Byrsonima inodorum S. Moore

Vernacular Name: Murici de galinha

18km from Porto Nacional on the road to Palmas,
10°31'S 48°22'W, alt. 390m.

In cerradão ciliar (gallery cerradão) along the bottom of a narrow valley which must be very damp during the rainy season.

Erect tree, 5m tall, 8cm dbh, with smooth silvery grey bark, in places fissuring into small quadrangular flakes. There are a number of erect trunks close together, presumably from a common root system. Foliage rather yellow-green.

2 xi 1997

Coll: J.A. Ratter, S. Bridgewater & J. Fonsêca Filho.
