

FLORA OF BRAZIL  
State of Tocantins

No. R7898

*Tococa*

21km from Monte Santo on the road to Divinópolis,  
9°53'S 49°08'W, alt. 250m.

On the edge of a clump of trees in a rather damp hollow  
with much *Curatella americana*. There is a buritizal  
nearby.

Soft shrub, 1.8m tall, forming a large clump, 4m across.  
Very floriferous. Petals pale waxy cream with a touch  
of pink; stamens, style and stigma waxy cream; ovary  
and rim of hypanthium rose.
